

TSSAG
is
one-
year
old!

 **15**
members to-date across 10 countries

 **Proven returns**
from member collaboration

 **13**
thought-leadership insights so far

 **Market profile**
increasing every day: through industry engagements
and social media activity

August 04, 2021 marks the first anniversary of the launch of TSSAG and what a year it has been!

The formation of TSSAG came at an unprecedented time for our industry and was established to provide access to a group of member firms with deep Securities Services and Post Trade expertise and broad geographical reach.

The combination of services offers a unique, specialist and results-driven network for the advisory, programme management, research and resourcing needs of the market and, critically, provides a forum for thought leadership and engagement given the undoubted changes and opportunities in the Global Securities Services landscape in the years ahead.

Here are a few highlights of the group's achievements and ambitions for the year ahead:

- ❖ 15 members across 10 countries with plans to more than double that number over the next year
- ❖ Key objective of member collaboration embracing geography and subject matter expertise has been highly successful with a number of active examples that enhance the overall proposition and quality of deliverables to clients
- ❖ 13 Thought Leadership pieces featured on the TSSAG website with others in the pipeline and plans to expand further through social media, in-person activity and relevant training initiatives in due course
- ❖ Increasing number of followers, participation in roundtables, speaking engagements, industry interviews and independent specialist support in the upcoming AST industry awards have assisted in raising the visibility of TSSAG, our objectives and the value the group can bring to the industry and our collective clients
- ❖ It has been a great first year and we look forward to making further progress against our core objectives in the year ahead. Exciting times!
